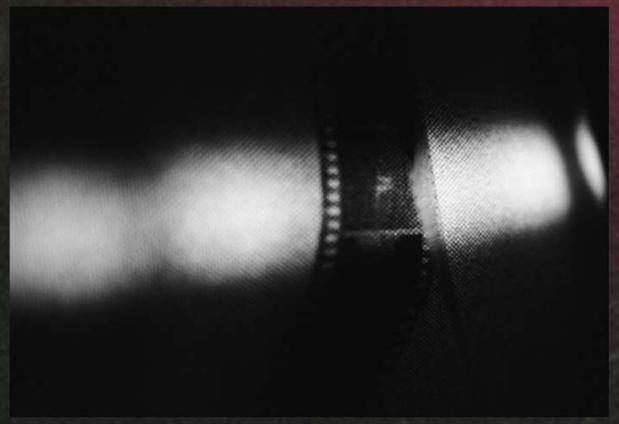
PRESENTATION

BRIGHT TV

VIEWERSHIP ANALYSIS

APRIL 2026

Business Objective



Grow BrightTV's subscription base by analysing user behaviour and viewership trends to generate actionable insights for Customer Value Management (CVM).

Key Questions

What are the user and usage trends?
What influences content consumption?
How can we increase low-day consumption?
How can we grow the user base?

Data Source

USER PROFILE DATA

- Demographics (Gender, Race, Age)
- Province
- Identity information

VIEWERSHIP DATA

- Viewing sessions
- Duration
- Channel/content
- Record date (UTC)

Data Preparation

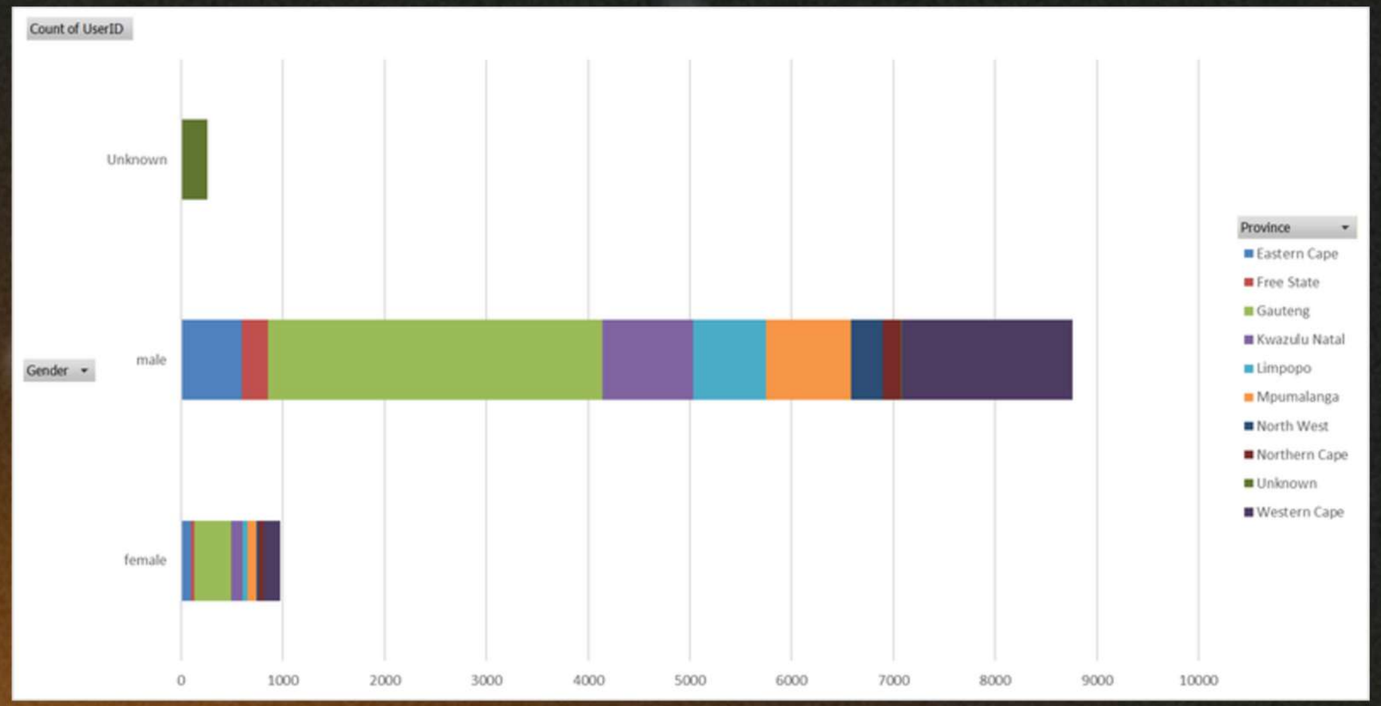
1. Handling NULL values
2. Time conversion (UTC → SA time)
3. Feature engineering:
   - Date
   - Hour of day
   - Day of week
   - Age groups
4. Data cleaning

Prepared dataset enables accurate analysis of user behaviour and engagement patterns.

Data Integration

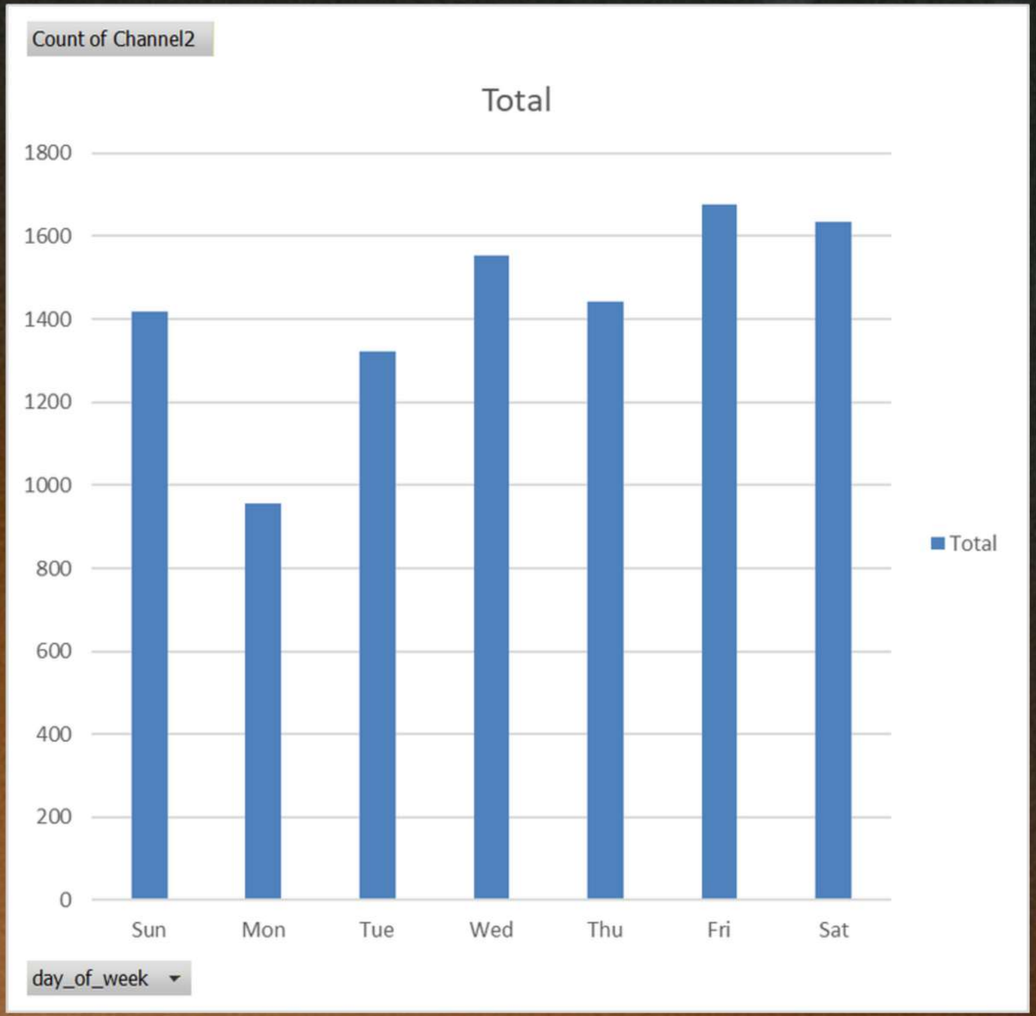
- Joined datasets using UserID
- Enriched viewership data with user demographics
- Created unified dataset for analysis

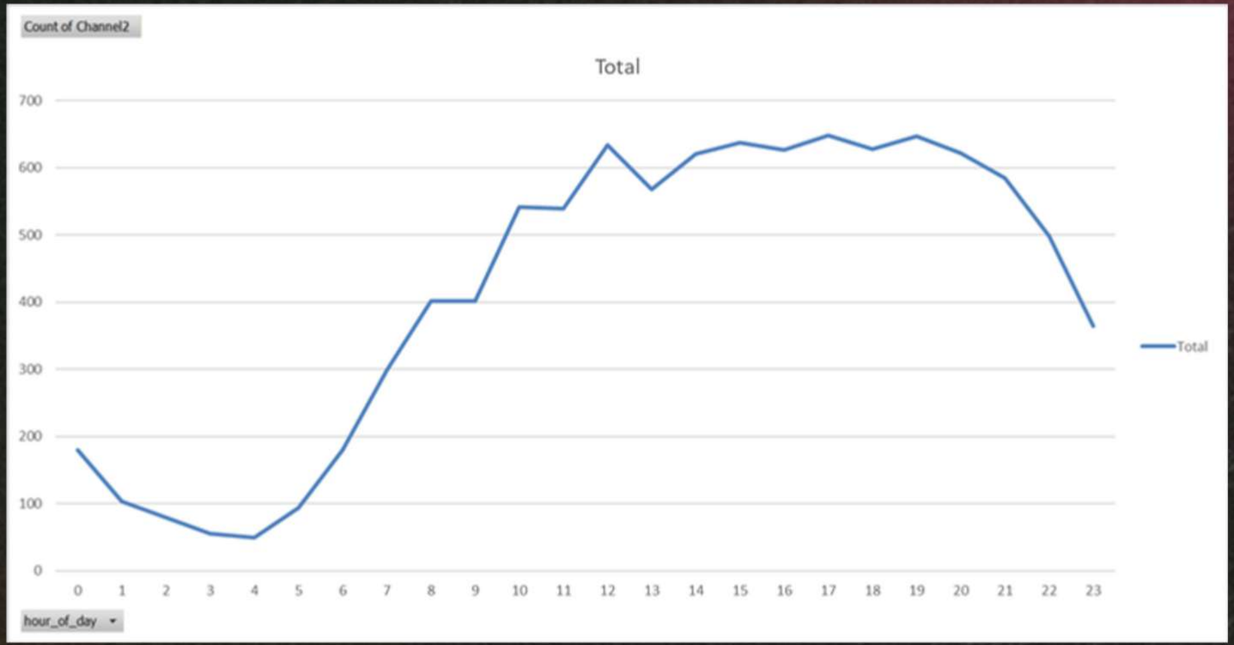
User Analysis



The user base is concentrated within specific demographic groups, with Gauteng representing the largest regional segment.

Usage Analysis

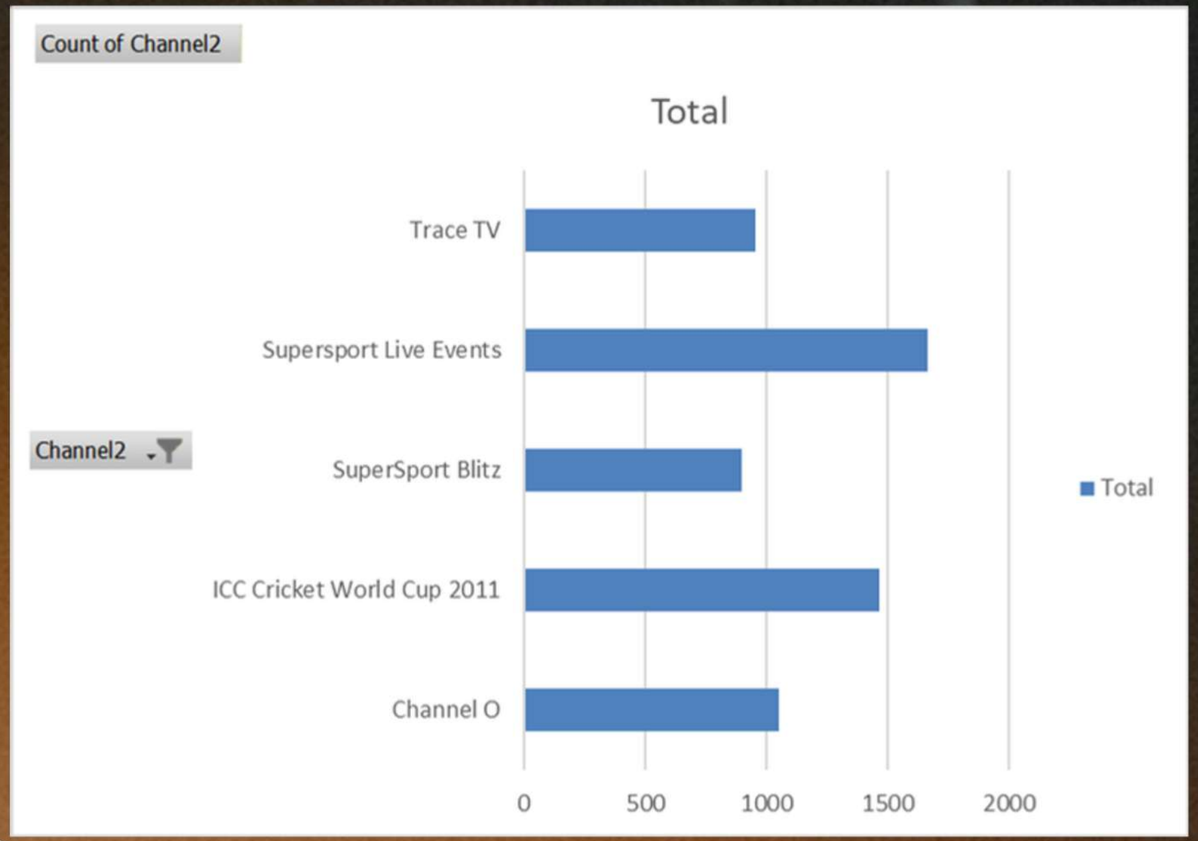




Viewing peaks between 14:00–20:00, with highest engagement on Wednesdays, Fridays, and Saturdays, while Monday shows the lowest activity.

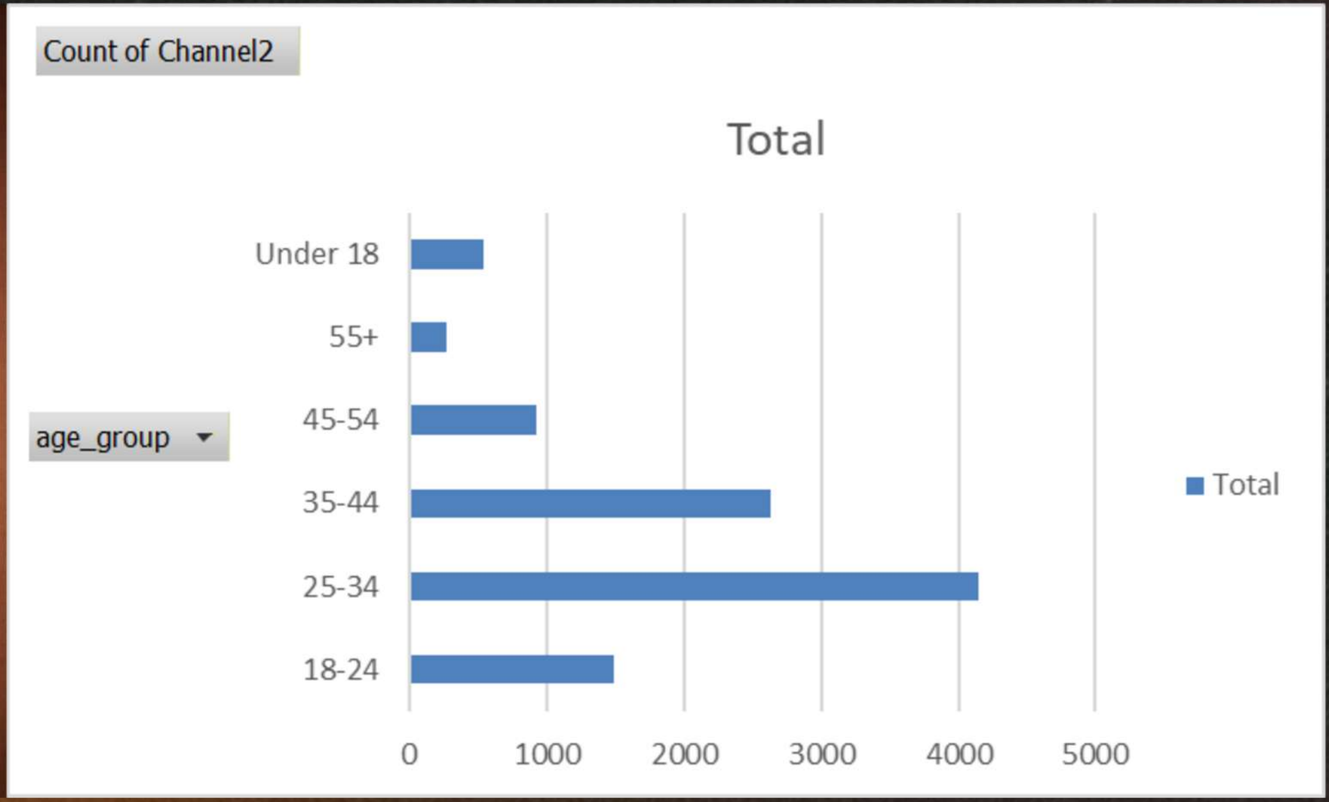
Content Analysis

A small number of channels dominate viewership, highlighting clear content preferences among users.



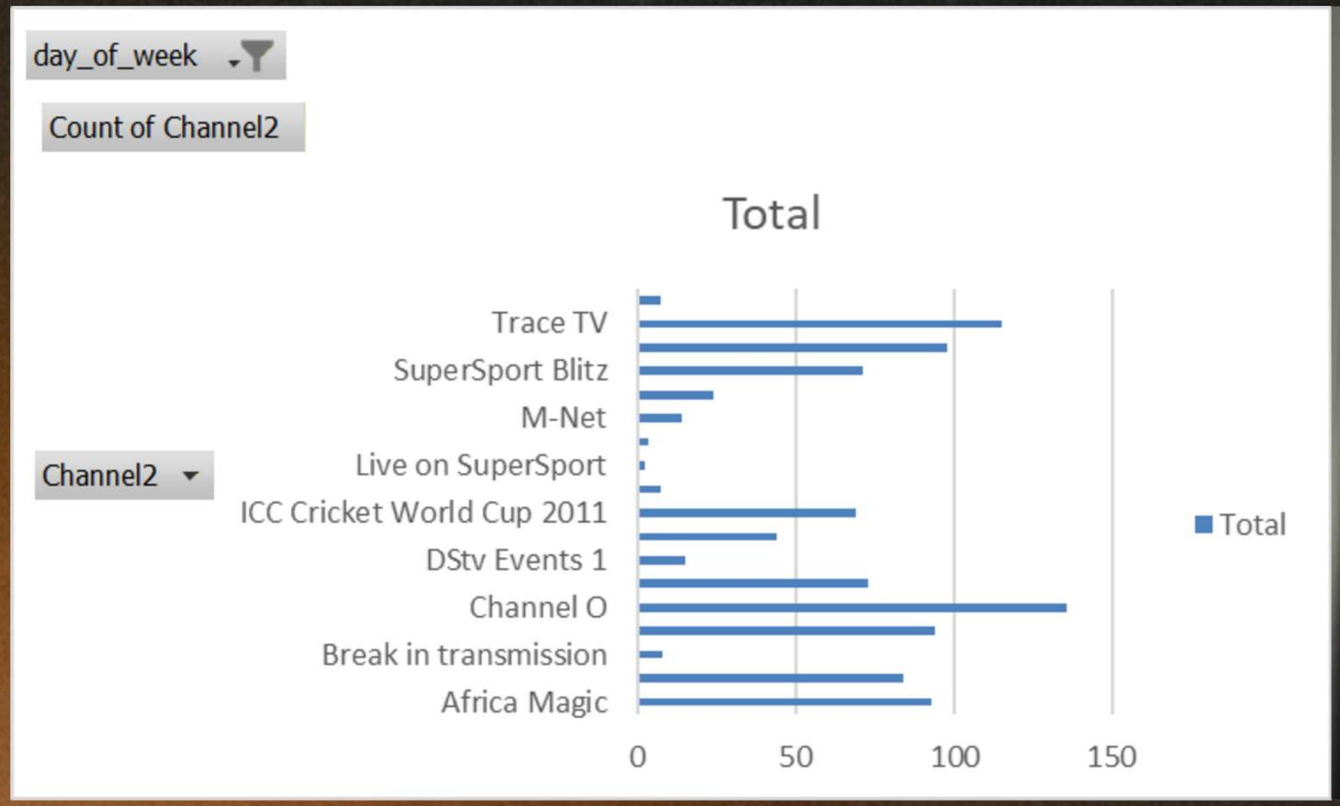
Engagement Analysis

Users aged 25–34 contribute the highest number of viewing sessions, making them the most engaged audience segment.



Low-Consumption Analysis

Low engagement on Mondays presents an opportunity to introduce targeted content and promotional strategies to increase viewership.



Key Insights

- Core audience: 25–34 in Gauteng
- Peak usage: 14:00–20:00
- Peak days: Wed, Fri, Sat
- Low day: Monday
- Content concentration in top channels

Strategic Recommendations

CONTENT STRATEGY

- Promote high-performing content
- Curate content for low-consumption days

GROWTH STRATEGY

- Target underrepresented demographics
- Province-specific campaigns

ENGAGEMENT STRATEGY

- Personalised recommendations
- Notifications during low periods

RETENTION STRATEGY

- Re-engage inactive users
- Loyalty and reward programmes

Expected Impact

- Increased user engagement
- Higher content consumption
- Improved retention rates
- Growth in subscription base

Conclusion

By combining user demographics with viewership behaviour, BrightTV can implement data-driven strategies to optimise content, improve engagement, and drive sustainable growth.
